

Pf lab 05 post task

Q1:

```
pf 5 task.cpp
1 #include <stdio.h>
2 int main ()
3 {
4     float temperature;
5     printf("enter the temperature\n");
6     scanf("%f", &temperature);
7
8     if(temperature<=15)
9     {
10        printf("cold today\n");
11    } else
12    {
13        if(temperature>15 && temperature<30)
14        {
15            printf("normal today");
16        } else
17        {
18            if(temperature>=30)
19            {
20                printf("hot today\n");
21            }
22        }
23    }
24 }
```

```
C:\Users\Hussani Enterprises\OneDrive\Desktop\pf 5 task.exe
enter the temperature
23
normal today
-----
Process exited after 1.114 seconds with return value 0
Press any key to continue . . .
```

Q2:

```
pf 5 task.cpp
1 #include <stdio.h>
2 int main()
3 {
4     int balance;
5
6     printf("enter the balance\n");
7     scanf("%d", &balance);
8
9     if(balance<=500)
10    {
11        printf("low balance\n");
12    } else
13    {
14        if(balance>500 && balance<=2000)
15        {
16            printf("sufficient balance\n");
17        } else
18        {
19            if (balance>2000)
20            {
21                printf("premium balance");
22            }
23        }
24    }
25 }
```

```
C:\Users\Hussani Enterprises\OneDrive\Desktop\pf 5 task.exe
enter the balance
670
sufficient balance
-----
Process exited after 3.734 seconds with return value 0
Press any key to continue . . .
```

Q3:

```
pf5task.cpp
1 #include <stdio.h>
2 int main()
3 {
4     int appointment, doctor_available, registration_completed;
5     printf("do you have the appointment : 1.for yes : 2.for no\n");
6     scanf("%d", &appointment);
7
8     printf("is doctor_available now : 1.for yes : 2.for no\n");
9     scanf("%d", &doctor_available);
10
11     printf("have you registration_completed : 1.for yes : 2.for no\n");
12     scanf("%d", &registration_completed);
